

**CFAES**

## Connecting conservation science and practice through large-scale, long-term experiments

**Nick Haddad, PhD**

Senior Terrestrial Ecologist at W.K. Kellogg Biological Station  
and Professor of Integrative Biology at the Michigan State University

SCHOOL OF ENVIRONMENT AND NATURAL RESOURCES

# SEMINAR SERIES

Nick Haddad is Director of the Long-Term Ecological Research site at Michigan State University's W.K. Kellogg Biological Station. He conducts long-term, large-scale experiments, and for all of them stakeholders are essential. Dr. Haddad's 30-year experiment on landscape corridors and biodiversity conservation is conducted with the USDA Forest Service on land owned by the Department of Energy. His 20-year restoration experiments for a rare butterfly occurs on land owned by the Department of Defense. And his 30-year experiment on the effects of land-use intensity and landscape diversity on ecosystem services in agriculture has relevance for management of working landscapes. The impact of his discovery-based research is magnified by interactions with social scientists and decision-makers.

**THURSDAY, NOVEMBER 18, 2021**

**Time:** 4:10 - 5:30 p.m.

**Location:** Kottman Hall 103

**Join via Zoom:** <https://osu.zoom.us/j/95059695689?pwd=dk5RN1hRZUs0bDJXV241Y3IGcmMzQT09>
