

THE WILDERNESS CENTER

SCIENCE-TO-GO ECOLOGY SEMINARS

Dr. Jeff Corney will offer an introduction to the ecological concepts and fascinating interconnections that provide the framework for our natural world.

SEMINAR I

Ecological Interactions

Saturday, February 11, 9:00 - 12:30

Topics include species adaptations, the interaction of plants and animals, disturbance of ecosystems and ecological succession that follows.

SEMINAR II

Nutrient Cycling

Saturday, February 25, 9:00 - 12:30

Topics include soil formation, soil organisms and decomposition, the cycling of nitrogen and other nutrients, the water cycle, and the unique properties of water.

SEMINAR III

Energy Flow

Saturday, March 4, 9:00 - 12:30

Topics include the flow of energy through ecosystems, photosynthesis and respiration, food web dynamics, global climates and ecological productivity.

Cost Per Seminar: \$30 members / \$45 non-members;

Entire Series: \$75 members / \$120 non-members

(advance purchase/non-refundable)
