Faculty Position in Ecosystem and Wildlife Health

The Department of Veterinary Preventive Medicine (VPM) at The Ohio State University College of Veterinary Medicine and the School of Environment and Natural Resources (SENR) at the College of Food Agricultural and Environmental Sciences invite applications for a 9-month, tenure-track faculty position in Ecosystem and Wildlife Health. The position will have a primary appointment in VPM (0.7 FTE) with a joint appointment (0.3 FTE) in SENR. The successful candidate will be part of a core Ecosystem Health teaching and research faculty appointed in VPM, SENR, and at the Cleveland Metroparks Zoo. The position is expected to be filled at the Assistant Professor level, but faculty rank will be based upon qualifications and experience of the candidate.

Teaching and Administrative Responsibilities: The successful candidate will spend approximately 50% of time teaching. The candidate will be expected to create a new undergraduate course and a new graduate course focused on wildlife health and disease ecology. In addition, he or she will lead the creation and implementation of a new graduate specialization in Ecosystem Health within the existing Master of Environment and Natural Resources (MENR) degree program. This role will include administrative duties as well as the supervision and mentoring of graduate students enrolled in the specialization.

Research Responsibilities: The successful candidate will spend approximately 50% of time conducting research. Expectations are to develop a nationally recognized scholarly research program incorporating graduate and undergraduate students, including independent or collaborative research relevant to VPM and SENR. The candidate will develop an externally funded research program that incorporates Ecosystem Health MENR graduate students. Opportunities exist for collaboration with other ecosystem health specialists, ecologists, epidemiologists, microbiologists, and related specialists working in diverse areas of ecology, animal health, population health, environmental health, and zoonotic diseases within the Departments of VPM and SENR. Multi-disciplinary opportunities are also available within the OSU including the Infectious Diseases Institute and the Global One Health Initiative.

Required characteristics of the successful candidate include:

• PhD degree in a discipline directly relevant to Ecosystem Health (e.g. Wildlife Ecology, Epidemiology, Biological Sciences, or related field), or a Doctor of Veterinary Medicine (DVM or equivalent)
• Clear evidence of scholarly expertise in wildlife health and disease ecology that is directly relevant to our broader Ecosystem Health program
• Experience in teaching undergraduate or graduate courses
• Experience mentoring undergraduate or graduate students
• Excellent oral and written communication skills
• Willingness and ability to work cooperatively with other faculty and staff, as well as with wildlife, fisheries and veterinary professionals within and outside the university, including wildlife conservation agencies and non-governmental organizations

Other desired characteristics of the successful candidate include:
The Department of Veterinary Preventive Medicine provides the major population medicine and ecosystem health focus for the College of Veterinary Medicine. Activities in the department combine basic and applied research to address problems in broad areas of animal health, production and veterinary public health. There are approximately 35 faculty members in the department located at the College of Veterinary Medicine in Columbus, the Food Animal Health Research Program (FAHRP) in Wooster, and The Ohio State Large Animal Services at Marysville. This structure provides extensive teaching resources and considerable opportunity for collaborative research.

The School of Environment and Natural Resources provides a focus on the interactions of people and the environment, with expertise in both terrestrial and aquatic environments. There are approximately 45 members located on both the Columbus and Wooster campuses. Research areas of focus include quantitative ecology, conservation biology, wildlife management, human dimensions in environment, and aquatic science and management. Wildlife faculty in SENR maintain a cooperative relationship with Ohio Division of Wildlife through the Terrestrial Wildlife Ecology Lab.

The Ohio State University was recently ranked third nationally on the list of best places to work in academia, according to The Scientist magazine. Columbus is the 15th ranked city by size in the United States (population of 730,000) and supports a vibrant, multifaceted community. Collegiality, civility, mutual support, and respect for others are strongly held values in our College. We support diverse beliefs and the free exchange of ideas and expect that faculty, staff, and students promote these values and apply them in a professional manner in all academic endeavors.

Review of applications will begin February 28nd, 2019 and will continue until an acceptable candidate is identified. Applicants should submit: 1) a letter of application, 2) a statement of professional goals, 3) a statement of teaching philosophy, 4) a statement of research interests and how those would be integrated into the OSU Ecosystem Health program 5) a current curriculum vitae, and 6) and letters from three professional references, including one person mentored by the applicant. Please indicate which individual serves as the mentored reference. Application packages should be addressed to: Dr. Pam Dennis, Search Committee Chair, Veterinary Preventive Medicine, The Ohio State University, 1920 Coffey Road, Columbus, OH 43210; phone 614 292 1206; and should be submitted by email to Ms. Casey Hofmann <hofmann.75@osu.edu>. Further information can be obtained at <https://vet.osu.edu/preventive-medicine/job-postings>

Ohio State encourages applications from individuals with disabilities, minorities, veterans, and women. The Ohio State University is an EEO/AA employer and is a tobacco-free campus.
