

# The Gray Aquatic Physiological Ecology Lab – Now Hiring!

## Undergraduate Research Assistant Position

We are seeking one full time (~38 hrs/wk) student for a paid position in the [Gray Aquatic Physiological Ecology Lab](#) for Summer 2022. The position will be based at OSU's Stone Laboratory (South Bass Island, Lake Erie). This is a great opportunity be a part of research in action: receive training on live fish care, contribute to various research projects, and access to professional development opportunities.

**Position description:** The student assistant will help to collect and maintain live fish populations; run experiments in the lab and on the lake; collect, enter and organize data; maintain careful records of all procedures. In addition to hourly pay, housing will be provided for 12 weeks in the OSU Stone Lab Bunkhouse (shared housing with kitchen; food not included) with transport from Columbus to the island.

### Requirements:

- Available to live on island in Lake Erie for ~3 months
- Previous experience with fish/animal care is preferred.
- Major relating to aquatic sciences preferred

**When:** Mid-May to Mid-August, 2022

**Where:** Stone Laboratory, Lake Erie

**Hours:** 38 hrs/wk

**Pay:** \$11-12/hr

**To Apply:** Submit a single pdf with a cover letter describing your interest, any previous fish care experience and availability (e.g. weekends), a CV/resume and contact info for 3 references to:
