White-tailed deer use of forest edge habitat in former mineland

Caitlin Mack, The Wilds

Moth diversity and abundance at *the Wilds*

Erin Peterman, The Wilds

Diversity of frog species as an indicator of ecosystem quality in central Ohio wetlands

Sarah E. Taynor, Capital University

Planning, design, and effectiveness of deer-deterrent road crossings in a large-scale fencing project

Mike Watson, Holden Arboretum

Effects of habitat patch size on the abundance of red-backed salamanders (*Plethodon cinereus*)

Andrew Wilk, The Ohio State University

Meet our Keynote Speaker

Dr. Paul Curtis

Dr. Paul D. Curtis has coordinated the Wildlife Damage Management Program for Cornell University Cooperative Extension during the past 26 years. He received a Ph.D. in Zoology from North Carolina State University in 1990 and a M.S. in Wildlife Biology from Colorado State University in 1981. His research interests include human-wildlife conflicts in suburban, forested, and agricultural landscapes, wildlife fertility control, and resolving community-based wildlife issues. He currently supervises research projects dealing with white-tailed deer, colonial waterbird and urban goose management, and bird damage to fruit crops. His extension programming has included a variety of wildlife-related booklets, videos, and fact sheets. He is a co-author of the National Wildlife Control Training Program books and online course. Dr. Curtis is a Certified Wildlife Biologist with the Wildlife Society.

57TH OHIO FISH AND WILDLIFE CONFERENCE
