

Phase 3: Household Survey

Research Sites:

Miami, FL; Lewiston, ME; Columbus, OH; Honolulu, HI, Burlington, VT

Using the findings from the Phase 2 interviews, a farm household survey has been developed and will be sent to a total of 1600 households (400 farm households from each study site).

The data will be analyzed to show the rates of off-farm employment, proportion of farms seeking to grow, proportion of farms prioritizing family farm persistence, etc. Analysis will also be done to cluster or categorize farms according to their demographic, farm structure, goal, and farm development and reproduction characteristics.
