Eco Engineering Mission Statement:

“Help customers identify and implement clean energy solutions that deliver improved financial results while creating an ideal visual environment and preserving our world for future generations”

On the Job

Created an organized contractor database

- Collected data from contractors
- Made calls and sent emails to companies for missing information
- Consolidated old data from thousands of companies
- Developed Microsoft Excel skills and improved communication skills

Other duties included :

- Worked with project managers to help with paperwork needed to close out projects
- Participated in company meetings

Reflection

Future career

- Want to work for a company that specializes in sustainability, or do sustainability consulting
- Particularly interested in energy savings/renewable energy
- Seeking any kind of sustainability job, but would enjoy working in this industry

Advice to fellow students

- Learn everything you can about the business
- Ask for help when you are stuck with a task
- Be aggressive in seeking learning opportunities
- Make connections with coworkers and supervisors
