Rural Sociology 7600  
Theories and Concepts in Rural Sociology  
Fall 2013 Syllabus

Instructor: Dr. Linda M. Lobao  
Office: 320D Kottman Hall  
Phone: 292-6394  
E-mail: lobao.1@osu.edu  
Office Associate: Mary Slyby  
Slyby.5@osu.edu: 688-3421  
Office Hours: Thursday 1:00-2:00 PM and Friday 3:00-5:00 PM and by appointment

Course Description

Rural sociology is a broad sub-field of sociology which is informed theoretically and methodologically by the broader discipline. This course examines the distinct substantive foci of rural sociology, including agriculture, environment, social inequalities, globalization/international development, community, and demographic processes—and the conceptual perspectives that have been applied to understand these substantive topics. In addition, the course addresses broader sociological questions about uneven regional development, the role of space in social theory, and the social construction of "rurality." We will focus on classic and contemporary “big-picture research questions” that rural sociologists address—and also examine how these might be carried-down to more empirically-oriented work.

The course has a seminar format and is directed toward students with a strong social science background. It is centered upon class discussion, critique of the readings, and your involvement in research assignments related to the course topic. We will also have rural sociology faculty members visit the course to discuss the exciting range of research topics they study!

Course Objectives

Student completing this class should gain the following knowledge and skills:

1. Understand the major research areas in contemporary rural sociology, with their conceptual literatures and empirical traditions.

2. Gain a general background in key substantive focus areas of rural sociology, particularly agriculture, the environment, demographic change, social inequalities, and globalization/development.

3. Gain the opportunity to pursue your independent research related to thesis, dissertation work, and other scholarly interests, including working on your own articles for presentations and publications.

4. Acquire an understanding of rural sociology as an overall field. Students will gain a “sociology of knowledge” understanding of rural sociology, which situates the sub-field of rural sociology into the broader discipline of sociology and other social sciences--and also traces the development of the body of work in rural sociology, historically.

5. Be able to demonstrate how rurality introduces a spatial contingency to theory and social science generalization. That is, students should understand how and why trends and relationships involving
social life found in the urban U.S. (the main focus of “modern” sociology) may not hold in other sociospatial settings.

6. Gain expanded analytical skills necessary for advanced work in the social sciences. We will discuss how sociologists use and apply theory and concepts to various topics and how they interpret research results. The class should also help you to sharpen critical thinking, as you engage in critiquing the theoretical and methodological approaches presented in the readings.

**Course Requirements and Grading**

This course has three sets of written requirements in regard to grading: (A) a short review of literature on a rural sociological topic to be selected by the student--this review can be used to develop your term paper (literature review due date, week 5, September 23); (B) a term paper on a topic that is mutually agreeable (due date, the last day of class, December 2) (C) three critical essay papers involving questions about the readings (I will provide these questions to you a week earlier in advance). In addition, each student will participate in an assignment that involves leading discussion of readings for one class period.

The grade you earn is determined in the following way. The literature review and the term paper count 10% and 30%, respectively, toward your final grade. Each critical essay paper counts 10%. An evaluation of your class discussion performance and other class participation will count the remaining 30%. Criteria regarding class participation will be: (1) that your class participation reflects thoughtful consideration of the required readings, clearly demonstrating your knowledge, questions, and concerns about the topics introduced in the readings for each week; (2) that your discussion assignment is well-prepared and that your individual contribution is clear and high quality; (3) that you are consistent in class participation, which also means that you are fully present for each class in addition to being a conscientious participant. Arriving late/leaving early disrupts on-going class discussion--and hurts a seminar climate where everyone is counted upon to contribute and to be “on the same page” in terms of material discussed.

**Required Readings**

Books:

Articles: available electronically. *Noted under each reading, is how you can download each of these readings: directly on-line via Carmen or (if not posted on Carmen) via the OSU Library electronic journal system.*

**List of Topics and Required Readings**

Week 1 (August 26) Overview of course.

Grading and Administrative Procedures. Begin discussion of class topics, focusing on Rural Sociology’s relationship to other social sciences and the discipline of sociology.
Week 2 (September 2) No Class – Labor Day— a break for all laborers!

Weeks 3, 4, 5  Situating Rural Sociology with Regard to: the Broader Discipline of Sociology, Sociological Theory, and the University Institutional Setting

This section addresses how rural sociology developed historically as a distinct sub-field in sociology and its link with related fields. It also addresses how rural sociology is practiced in institutional settings.

Week 3 (September 9) Surveying the Field

Week 4 (September 16) Connections with Classical Sociological Theory and Public/Policy Sociology

Week 5 (September 23): Contemporary Research in Rural Sociology: Some OSU examples

Guest speakers, rural sociology faculty, Professors Kristi Lekies, Cathy Rakowski, Joe Donnermeyer, Kerry Ard, and Jeff Sharp will discuss their research. Readings will be provided beforehand for the class.

**LITERATURE REVIEW DUE SEPTEMBER 23**

Week 6 (September 30) Population Patterns and Urban - Rural Differences and Patterns of Change

This section addresses major economic, social, and demographic changes relevant to understanding U.S. rural society, including a comparison with past history. It covers the “rural demography” tradition.

Brown and Swanson, Chapter 1 by Kenneth Johnson; Chapter 10 by David McGranahan, Chapter 11 by Falk and Lobao; Chapter 12 by Tigges and Fuguitt; Chapter 23 by Jackson-Smith.

Week 7 (October 7): Agrarian Change, Land Dispossession and Rural Society

This section addresses the fate of farm populations in the course of development in historical comparative perspective. It covers the classical sociology of agriculture tradition.

Week 8 (October 14) The Contemporary Food System

This section addresses modern food system and questions about production/consumption in agriculture.
Week 9 (October 21) Environment and Natural Resources
This section addresses the relationship between the environment and development and provides an overview of the rural sociological literature on environmental sociology.

Brown and Swanson, Chapter 24 by England and Brown.

Week 10 (October 28) Inequality in Rural Society: Class, Gender, Ethnicity
This section examines the contours of stratification in the rural U.S. It covers the “rural poverty” tradition.

Ann Tickamyer, Rural Poverty. (Chapter 30 in Cloke, Marsden, and Mooney volume on Rural Studies, Sage. 2006). (electronic copy via Carmen)
Week 11 (November 4) Rural Development and Spatial Inequality

This section addresses uneven development, place-stratification, and policy response strategies to rural disadvantage such as economic development policy and educational upgrading.

Brown and Swanson, Chapter 7 by Lichter et al.; Chapter 21 by Beaulieu, Israel, and Wimberley; Chapter 26 by Green

Week 12 (November 11) No Class—Veteran’s Day

Week 13 (November 18) Community

This section address the rural community research tradition.

Salamon, *Newcomers to Old Towns* (select chapters)

Swanson and Brown, Chapter 15 by Luloff and Bridger

Week 14 (November 25) Development and Globalization. While articles have addressed other nations throughout this course, this section specifically addresses research applied to international development/globalization and social change.

Week 15 (December 2) Continuing Challenges for the Profession

Brown and Swanson, Conclusion, pp.397-405

COURSE TERM PAPER DUE WEEK 15, December 2
